

Our Roofing Process

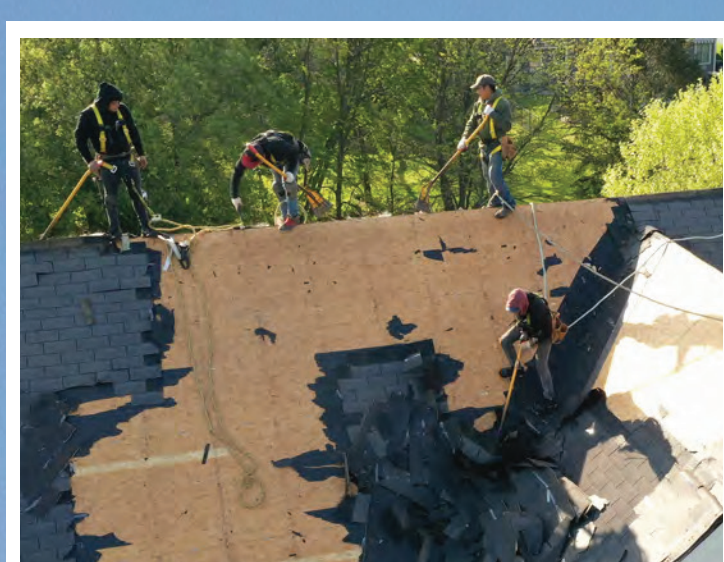

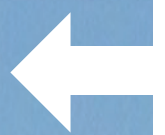

Your contractor is scheduled to install your new roof next week. Do you know what to expect? Let's take a step-by-step look at the process so you're prepared.

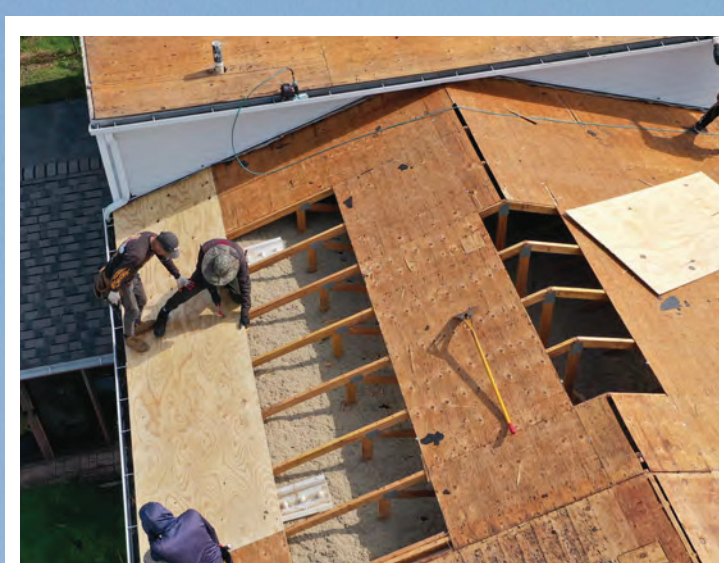

STEP 1 Delivery of materials and a dumpster 1-2 days prior to the installation day.

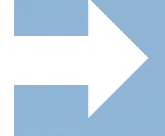

STEP 2 Apply tarps to cover siding and landscaping as necessary.

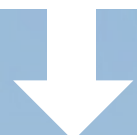

STEP 3 Tear off the old roof, including flashing, shingles, and underlayments.

STEP 4 Inspect roof decking and replace any decking boards that are rotten or soft.

STEP 5 Install roof deck protection to prevent ice dams and water damage from rain.

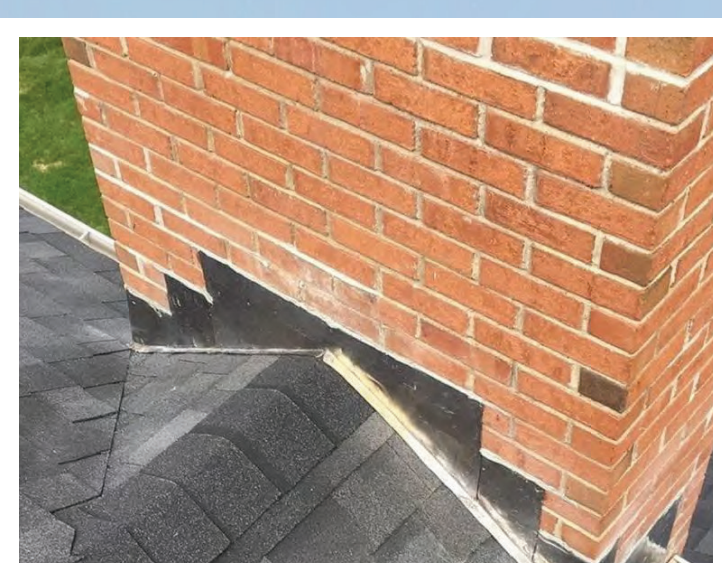

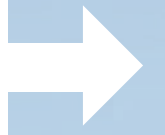

STEP 6 Apply a drip edge to prevent water from getting to the decking.

STEP 7 Install asphalt shingles, beginning with a starter strip to protect seams.

STEP 8 Install new vents to ensure good ventilation and prevent ice dams and condensation.

STEP 9 Install new flashing to direct water away from areas that are more likely to leak.

STEP 10: Enjoy Your New Roof!

We meticulously clean the job site so it feels like we were never there—and you can rest easy knowing you're protected by your new roof.

For the quality you expect—and the peace of mind you deserve, choose Oaks Roofing and Siding.
